

PHP Ernest Future Improvements

Request

Future versions will input mapped arrays of values and units and we will maintain the return_unit string input.

Request	Data type
units	array
value	array
return_unit	string

Exception handling

Instead of using generic exceptions classes, future versions will have specific exception classes for specific exceptions

ProcessDistanceAddition Class

Refactor is required on the routine used to get operands i.e between line 30 and 38 in *app/Domain/ProcessMeasurement/Services/ProcessDistanceAddition.php*

DistanceConvertor Class

Addition units of measurements in the *config/enums.php*
